

Priority Board

Feature Specification

Document ref:	WDU-SPEC-014	Status:	Approved
Version:	1.1	Last updated:	27 August 2026

Overview

The Priority Board allows team members to manage and prioritise work items by moving tasks between workflow stages using drag and drop. Tasks can be moved freely between the Backlog and In Progress columns.

Feature Description

- Board layout:** The board displays two columns: Backlog and In Progress. All tasks start in the Backlog column when the page loads.
- Tasks:** The board contains three pre-defined tasks: "Fix login bug", "Write unit tests", and "Update docs".
- Drag and drop:** Users can drag any task from the Backlog column to the In Progress column, or from In Progress back to the Backlog column.
- Confirmation message:** When a task is moved, the board displays a confirmation message naming the task and its destination column. Examples: "Fix login bug" moved to In Progress / "Write unit tests" moved to Backlog.

Acceptance Criteria

ID	Criterion
AC-001	All three tasks are visible in the Backlog column on page load.
AC-002	A task can be dragged from Backlog to In Progress.
AC-003	A task can be dragged from In Progress back to Backlog.
AC-004	After a successful drag, the task appears in the destination column.
AC-005	A confirmation message is displayed after each successful move.
AC-006	The confirmation message names the task and the destination column.
